PROFESSIONAL SUMMARY

Detail-oriented Computer Science student equipped with academic excellence and practical experience in frontend engineering, full-stack application development, and programmatic problem-solving. Eager to secure a dynamic software engineering internship to build scalable architectures, master modern technical frameworks, and contribute to production-grade initiatives.

EDUCATION

GVP College of Engineering for Women (GVPCEW), Vizag 2024 – Present
Bachelor of Technology (B.Tech) in Computer Science Engineering Current Student

TECHNICAL SKILLS

- Core Programming Languages:** Python, C
- Web Frameworks & Technologies:** HTML5, CSS3, JavaScript (ES6+), React/Vite, Express.js, MongoDB
- Developer Ecosystem & Tools:** Git, GitHub, VS Code, Streamlit
- Computer Science Fundamentals:** Data Structures (Basics), Object-Oriented Programming (OOP), Algorithmic Problem Solving

TECHNICAL PROJECTS

Mini CRM (Customer Relationship Management) *React/Vite, Express.js, MongoDB, Node.js*

- Architected a full-stack customer relationship management system featuring secure user data processing and client tracking pipelines.
- Built a responsive interactive dashboard using React and Vite to visualize sales metrics and customer segment logs in real time.
- Developed robust Express backend routes coupled with MongoDB schemas for flexible, high-performance database management.

Moonlight Cafe – Frontend Web Application *HTML5, CSS3, JavaScript*

- Designed and developed a fully responsive, visually captivating landing page and digital menu system for a modern aesthetic cafe.
- Programmed an interactive cart logic using modular DOM event listeners to handle real-time price updates and checkout simulations.
- Optimized the presentation layer with clean CSS layout patterns and fluid responsive transitions to maximize device accessibility.

TaskZen – Dynamic Todo List & Task Manager *JavaScript (ES6+), HTML5, CSS3*

- Orchestrated a productivity-focused task management program supporting priority tagging arrays and category filtration toggles.
- Integrated local storage data persistence mechanisms to ensure consistent state recovery across browser reloads and user sessions.
- Constructed structured DOM manipulation workflows to seamlessly animate item creation, completion states, and removal triggers.

PROFESSIONAL CERTIFICATIONS

- Cisco Academy: Python Essentials Certification
- Cisco Academy: C Essentials Certification
- FutureSkills Prime: Web Development Fundamentals

AREAS OF FOCUS & COMPETENCIES

- Core Professional Interests:** Full Stack Web Engineering, Intelligent AI-Native Applications, UI/UX Design Systems
- Core Human Strengths:** Rapid technological adaptation, critical analytical thinking, structured problem solving, and team collaboration

EXTRA-CURRICULAR ACTIVITIES

- Hackathon Competitor:** Pitched, refined, and demonstrated technical project capabilities under tight timelines.
